## SUBJECT INDEX

### A

acid phosphatase 85, 155, 679
  in alveolar macrophages 85
  in lysosomes of kidney 679
  in spleen cells of mouse 55
  technique with cerium capture agent 155
  X-ray microanalysis 155, 679
actinomycin-D 129
  prevention of DNA strand breaks due to UV 129
adenohypophysis 119
  ornithine decarboxylase immunoreactivity 119
  polyamine biosynthesis 119
affinity chromatography
  for isolation of microtubule-binding proteins 805
  polyclonal antibodies against tau polypeptides 805
    from immature chicken or rat brain 805
  isolation of three polypeptides 805
ageing
  brain metabolic control 631
    by multivariate data analysis 631
    effect of acetyl-L-carnitine 631
  liver mice protein synthesis 607
    by EM RAG 607
  RBC membranes 15
    progressive rigidity 15
alanine amino-transferase in snails 385
alkaline phosphatase 309, 509
  increase by $1,25(OH)_2$ vit $D_3$ 509
    in alveolar bone cells of rats 509
  of fresh water snails 309
    intermediate hosts of Schistosomiasis 309
alloxan induced diabetes 585
  potentialisating effect of cyclosporin 585
alveolar
  bone cells of rats 509
    alkaline phosphatase increase by $1,25(OH)_2$ vit $D_3$ 509
    phenotype 509
    synthesis of
      collagen type I 509
      collagen type III 509
      fibronectin 509
      Gla-protein 509
  macrophages 85, 353, 475
    cathepsin B 353
    enhanced phagocytosis 475
    morphological heterogeneity 85
    lysosomal enzymes 85
    pulmonary surfactant 475
cAMP dependent protein kinase 325
  in somatic cells of seminiferous tubules 325
    effect of retinol 337
androgen dependent epididymal protein mature form 757
  molecular cloning 757
  characterization of a cDNA encoding 757
anaerobic respiration in Schistosomiasis 1
analysis of transverse magnetization decay curves 9
ANF activation of guanylate cyclase in rat lung 455
  ultrastructure 455
angioma fusiform cells stimulation by melanoma cells 745
  secretion of a neomatrix playing a role 745
    in metastasis *in vitro* 745
antibodies
  anti-protein kinase c-isozymes:
    I, MC-1a; II, MC-2a; III, MC-3a 805
    in human thyroid gland 805
  anti PKC II isozyme is expressed at larger amounts in cancer tissues 805
  monoclonal and polyclonal
    proteins of yolk and their precursors 639
    gradient gel electrophoresis 639
antigenic
  cyst wall 21
  expression of ornithine decarboxylase 119
    in frogs 119
    not in rats and in human 119
anti-meprobomate anti-bovine albumin 149
  immunoreaction in the synapses of rats 149
    at the neuromuscular junctions 149
arterial development 531
  smooth muscle cells 531
  multiparametral enzyme analysis 531
    in hypertension 531
    in remodeling 531
asialoglycoproteins
  high voltage EM 165
  gold particles coupled to lactosylated albumin 165
aspartate amino-transferase in snails 385
basic fibroblast growing factor 745

### B

binding affinity of lectin 61, 623
  in olfactory neurons of eel 61
    labeling with
      biotinyle 61
      HRP 61
  to zona pellucida 623
    during hamster oocyte maturation 623
*Biomphalaria alexandrina*
  irradiation 1, 309, 385
  lactate dehydrogenase 1, 385
  transaminases 385
bioassays of brain extracts on tissue cultures 687
  of snail gonadal cells 687
  ADN and protein syntheses analysis 687
  inhibitory action 687
  liquid scintillation analysis 687
brain
  enzymatic glycogen biosynthesis 433
  glycogen synthase 433
  glycoprotein 433
  polypeptide synthesis during n-butanol ingestion 671
n-butanol ingestion effects on brain polypeptide synthesis 671
  resistance of *in vitro* brain ribosomal function to
  acute inhibitory action of
    ethanol 671
    isopropanol 671
  role of temperature: translation system
    less stimulable if temperature high 671
    more stimulable if temperature is low 671

## C

calcium ionophore
A23187 51
treatment of Lewis lung carcinoma 51
cAMP dependent protein kinase 325
in somatic cells of seminiferous tubules 325
effect of retinol 337
cancer cells relations with circulating polyamines (PA) 773
erythrocyte circulating polyamine is index of cell proliferation 773
promotion of
malignant cell proliferation 773
metastatic dissemination 773
PA more rapidly internalized than by normal cells 773
binding of PA on specific acceptor sites of membranes 773
facilitation of compartimentalization 773
favour new enzyme and/or immune capacities 773
carbohydrate moieties relation to cell-cell interactions 61
in primary olfactory
neurons 61
nerve fibers 61
terminals of bulbs 61
carcinoma of lung 51
functional changes 51
morphological changes 51
treatment with A23187 calcium ionophore 51
catecholamine related enzymes 519
in primary sensory neurons subpopulations 519
in dorsal root ganglia of rats 519
dopamine-β-hydroxylase 519
monoamino oxidase 519
tyrosine hydroxylase 519
cathepsin B 85, 353
cathepsin B 353
fluorescence 353
cDNA molecular cloning of an androgen dependent epididymal protein mature form 757
characterization of a cDNA encoding 757
cell
culture of *Drosophila melanogaster* 41
separation system
in mixed culture of single wild strain 359
of tetrads forming mutant strain 359
of *Micrococcus luteus* 359
cerebellar cortex glycosaminoglycans 391
cerebral green cells of snails 205
somatostatin-like substance 205
cerium 279, 295, 474
as amplifying agent and visualization of
D-amino-acid oxidases 279
perhydroxidase 295
phosphatases 474
oxalate 474
phosphate 474
*c-fos* gene induction is transient 793
by autorepression of its transcription 793
forskolin induces transient expression of the *c-fos* gene 793
which in presence of calcium ionophore A23187
activates function of cAMP response elements = -60CRE 793
downregulation by pre-existing factors 793
Chaga's disease 73
chicken glycosaminoglycans in cerebellar cortex 391
choline containing phospholipids in human lymphocytes 705
phorbol esters stimulating synthesis and breakdown 705
chromatography gas-liquid 445
human transferrin 445
ciprofibrate 705, 723, 765
on male wistar rats comparative and simultaneous effects on plasma lipids 765
on triglycerides 765
not on cholesterol 765
upon hepatic drug metabolism 765
peroxisome proliferation 765
increase effects on
mitochondrial R-3-hydroxybutyrate dehydrogenase mRNA 723
peroxysomal acyl-CoA oxidase mRNA 723
proliferation 723
serine alanine amino transferase by simvastatine plus clofibrate 723
circulating polyamines in oncology: biological significance 773
erythrocyte circulating polyamine is index of cell proliferation 773
promoter of
malignant cell proliferation 773
metastatic dissemination 773
more rapidly internalized by cancer cells than by normal cells 773
binding to specific acceptor sites
on membranes of cancer cells 773
facilitate compartimentalization 773
favour new enzyme and/or immune capacities 773
clones of *Trypanozoma cruzi* 73
structures 73
codage for somatostatin identical
in snails 205
in mammals 205
collagen
$^3$H-proline decidual cells radioautography in EM 315
synthesis in fibroblast cultures 751
stimulated by superoxide 751
created by hydroxyfumarate 751
dominent type III
type I
modulation of differential collagen gene expression 751
colloidal gold coupled to lactosylated albumin 165
colony-stimulating factor = rhGM-CSF 413
recombinant human granulocyte macrophage 413
*Colpoda inflata* 21
connective tissue 21
unability of osmoregulation 21
in salinities variations 21
constructs of kDNA probes 73
for clones of *Trypanozoma cruzi* 73
for sensitive detection
by polymerase chain reaction 73
cycloheximide 129
prevention of DNA strand breaks due to UV i29
cyclophosphamide effect on insulitis 575
cyclosporin potentialising effect on alloxan diabetes 585
cyst
antiserum 21
resting ciliate 21
wall 21
isolated 21
polypeptides 21
proteins 21
cytokine relations with heparin and heparan sulfate 2253
cytotoxicity of UV radiation 125, 139

## D

DAB polymerisation in perhydroxidase reaction 295
D-aminoacid oxidases 279
decay curves of transverse magnetization 9
decidual cells $^3$H-proline radioautography in EM 315
density fractions of alveolar macrophages 85
dependance of proton signals on hydration 9
deuterated water by RNM in seed hydration 9
development of cerebellar cortex 391
glycosaminoglycans 391

diabetes mellitus
sand rats (*Psammomys obesus*) 651
cataract high incidence 651
microangiopathy 651
membranes thickening
capillaries 651
Bowman's capsule 651
glomerular capillaries 651
retinopathy absent 651
various organs 651
streptozotocin induced 575
effect on endocrine pancreas of mice 575
neurotropin 575
cyclophosphamide 575
digestive cells of winkles 29
salinity changes influence on lysosomes 29
volume changes depending on salinities 29
regulatory mechanisms of
digestive cells volume 21
dihydrofolate reductase (DHFR)
implication in DNA synthesis 831
HeLa $S_3$ and Hl60 study by flow cytometry 831
aphidicolin as synchronizer 831
DNA study by propidium iodide 831
low DHFR in $G_0$-$G_1$ phases 831
increase in late S and $G_2$/M phases 831
DHFR marker of cycling cells 831
discontinuous Percoll gradient centrifugation = DPGC 8
dopamine-β-hydroxylase 519
in primary sensory neurons subpopulations 519
in dorsal root ganglia of rats 519
monoamino oxidase 519
tyrosine hydroxylase 519
dorsal root ganglia 173
immunohistochemistry 173
S-100 α & β protein subunits 173
DNA
fragments recombination 191
with genomic DNA in somatic cells 191
repair mechanisms after UV irradiation 125
on wild type of *E.coli* strains 125
dot blot analysis 41
of retroposons 1731 & 412
dorsal root ganglia 519
primary sensory neurons subpopulations 519
catecholamines related enzymes 519
DPGC = discontinuous Percoll gradient centrifugation 85
DPH fluorescent dye 15
*Drosophila melanogaster* 41

E

ecdysterone 41
decrease of retrotransposon transcription levels 41
eel primary olfactory neurons 61
eicosanoic production by peritoneal macrophages 565
stimulation by 565
calcium ionophore A23187 565
zymosan 565
electron microscopy 21, 51, 85, 155, 159, 165, 223, 295, 315, 455, 585, 607, 723
analytical EM 155, 165
endocrine pancreas 585
alloxane induced diabetes 585
enzymology 295, 455
hepatocytes 159
asialoglycoprotein 159
protein secretion in ageing mice 607
RAG 607
lung 455
guanylate cyclase in rat 455
ANF activation 455
immunology 21
peroxisomes 723
radioautography 315
decidual cells 315
electrophoresis 21
separation of cyst wall proteins 21
ELISA of yolk proteins 639
embryo manipulation 227
endocrine pancreas
insulitis of mice induced by streptozotocine 575
treatment by immunomodulators
cyclophosphamide 575
neurotropin 575
streptozotocin 575
diabetes induced by alloxan 585
treatment by cyclosporin 585
endogenous kinase activity 735
enzymatic
activities of hypolipemic agents and peroxisomes 723
brain initiation of glycogen biosynthesis 433
glycogen biosynthesis in brain of rat 433
heterogeneity of lysosomes
in fractionated alveolar macrophages 85
markers of arteries smooth muscle cells 531
epididymal protein androgen dependent mature form 757
molecular cloning 757
characterization of a cDNA encoding 757
erythrocytes fluorescence 15
aged and young 15
erythropoietin expression in submandibular glands 261
*Escherichia coli* wild and other types
DNA repair mechanisms after UV irradiation 125, 485
strains recovery of mutagenic effects 485
*recA*+ 485
*umuC* 485
17 β-estradiol
effects on normal and otosclerotic osteoblasts 597
non strict control of vitellogenin gene transcription 607
exocytosis of alveolar macrophages 85

F

fat storing cells 49
fibronectin for selective binding of c-reactive protein 421
fish winter flounder 607
gene transcription of vitellogenin 607
not under strict estrogen control 607
fluorescamine 15
fluorescence 15, 353, 565
aminocaproyl N-nitrobenzo -2-oxa-1,3diazole-PC 565
alveolar macrophages 353
cathepsin B 353
dyes: DPH, 3-PM and fluorescamine 15
erythrocytes 15
fatty acid analog AC-NBD
immunofluorescence (cf) 639
microscopy 565
peritoneal macrophages 565
follicular development and ovulation 607
by PMSG 607
by hCG 607
fractions of density 85
of alveolar macrophages 85
free
phospho-tyrosine in human liver 735
radical formation after UV irradiation 129
in various strains of *E. coli*
fresh water snails hydrolytic enzymes 309
*Fucus vesicolus* 31

G

ganglia of dorsal root 173
immunohistochemistry 173
S-100 α & β protein subunits 173
gas-liquid chromatography 445

human transferrin 445
gene transcription of vitellogenin 607
not under strict estrogen control 607
genetic markers for kinetoplastida 73
nuclear marker 73
extranuclear markers 73
genomic DNA in somatic cells 191
recombination of exogenous DNA fragments 191
in somatic cells of mice 191
glial cells
S-100 β-protein subunits predominancy 173
glucocorticoid hormones effect 463, 713
on small intestine of rat 463
lactase activity 463
mRNA expression 463
on thymocytes 713
destruction of cortical thymocytes 713
diminution of rosette-forming capacity 713
change of percentage of the 4 subsets 713
CD4-8-, CD4+8+, CD4+8-, CD4-8+
glucose uptake insulin-mediated 541
in rheumatoid arthritis synoviocytes 541
role of human recombinant interleukin-1 β 541
glucose-6-phosphatase 183
quantitative assays in hepatocytes 183
fresh water snails 309
intermediate hosts of Schistosomiasis 309
gold particles staining
coupled to lactosylated albumin 165
asialoglycoproteins 165
high voltage EM 165

gene transcription of vitellogenin 607
not under strict estrogen control 607
of retroposons 1731 412
nuclear magnetic resonance = NMR 9, 21, 631, 705
5'-nucleotidase in fresh water snails 309
intermediate hosts of Schistosomiasis 309
numerical density = ND 21

## O

olfactory
neurons of eel 61
lectin 61
oligosaccharides 61
N-acetyl-D-galactosamine 61
surface glycoconjugates 61
receptors 61
oocyte maturation of hamster 623
zona pellucida binding affinity of lectin 623
ornithine decarboxylase immunoreactivity 119
in pituitary gland 119
osmium in the cerium phosphatase method 474
osmoregulation of digestive cells volume 21
osteoblasts
DNA modulation 597
drop of DNA synthesis in normal and
otosclerotic cells 517
17 β-estradiol 597
corticosterone 597

testosterone 597
endocellular proteins neosynthesis by steroids 597
explants from cell culture 509
alkaline phosphatase increase by 1,25$(OH)_2$ vit $D_3$ 509
no mineralization 509
phenotype 509
synthesis of
collagen type I 509
collagen type III 509
fibronectin 509
Gla-protein 509
$^3$H-leucine uptake 597
normal cells 597
otosclerotic cells 597
secretion of proteins in the medium 597
under the influence of steroids 597
protein synthesis 597
$^3$H- thymidine uptake 597
overexpression of protein kinase c 813
in human thyroid proliferative disease 813
oviparous animals vitellogenin gene expression 607
non obligatory estrogen dependence 607
ovotestis bioassay of brain extract non gonadal cells 687
ovulation and follicular development 607
by PMSG 607
by hCG 607
oxypurinol inhibition of xanthine oxidase 213
in post-ischemic recovery of jejunal mucosa 213

**P**

pancreas endocrine of mice 575
treatment by immunomodulators 575
cyclophosphamide 575
neurotropin 575
streptozotocin 575
perhydroxidase cerium-DAB-nickel method 295
peroxysomal acyl-CoA oxidase mRNA increase 723
by ciprofibrate 723
peri-portal hepatocytes 193
glucose-6-phosphatase 193
peri-tubular cells in seminiferous tubules 325
cAMP dependent protein kinase 325
effect of retinol 337
peri-venous hepatocytes 193
glucose-6-phosphatase 193
phenotypes of osteoblasts obtained by culture 509
phorbol
ester integration in phospholipids 705
phorbol 12-myristate 13-acetate 705
myristate effect on
3LL tumor cell line 501
on metastasis 501
on secretion pattern 501
phosphatidylethanolamine in human lymphocytes 705
NMR studies with $^{31}$P and $^1$H 705
synthesis and breakdown 705
phospholipid translocation in plasma membrane 565
in mouse peritoneal macrophage 565
stimulation of eicosanoic production 565
phosphorylating agents like phosphotyrosine 735
physiological conditions of RBC manipulation 15
plasma membrane phospholipid translocation 565
in mouse peritoneal macrophage 565
stimulation of eicosanoic production 565
plasmid DNA 125, 485
lethal effect of
β methoxypsoralen 125, 485
near-UV 125, 485
mutation frequency in wild type of E.coli
increased after irradiation by UV 125
repair 125, 485
survival 125, 485
3-PM fluorescent dye 15
pneumocytes granular 51
in carcinoma of lung 51
in normal lungs 51
polyamine biosynthesis in adenohypophysis 119
polymerase
chain reaction 73
for sensitive detection of kDNA probes 73
for clones of *Trypanozoma cruzi* 73
poly(ADP)ribose 735
inhibited by 3-aminobenzamide = 3-AB 735
stimulated by methylmethane sulfonate 735
cause decrease of cell survival 735
potentiated by benzamide 735
polypeptides
of cyst wall 21
synthesis in brain during n-butanol ingestion 671
post-ischemic recovery of jejunal mucosa 213
by xanthine oxidase inhibitor oxypurinol 213
primary sensory neurons subpopulations 519
of dorsal root ganglia 519
catecholamines related enzymes 519
$^3$H-proline decidual cells radioautography in EM 315
protein
kinase c 813
protein kinases isozymes I, II and III 813
monoclonal antibodies
MC-1a, MC-2a, MC-3a 813
important difference for C type II
isozyme largerly expressed in cancer
tissues 813
kinase cAMP dependent 325

urea inhibition of respiration 1
UV irradiation 125, 139
in combination with psoralene 125
effect on plasmid DNA 139
alkylating agents 139
single and double strand breaks 139

## V

viral capsid DNA transfer 191
vitellogenin gene transcription 607
not under strict estrogen control 607
volume regulation of winkles digestive cells 29
influence of salinity 29

## W

wall polypeptides of cysts 21
water thermogravimetry 347
isothermic and dynamic analysis 347
in secretory tissues of the rabbit 347
salivary glands 347
Western blot of yolk proteins 639
wild type of *E.coli* strains 125
DNA repair mechanisms after UV irradiation 125
winkles digestive cells 29
winter flounder fish 607
gene transcription of vitellogenin 607
not under strict estrogen control 607

## X

xanthine oxidase inhibitor oxypurinol 213
in post-ischemic recovery of jejunal mucosa 2
*Xenopus laevis* embryo manipulation 227
translational regulation of the ribosomes amount 227
X-rays microanalysis 155, 679
accelerating voltage 300-400 kV 155
acid phosphatase 155, 679
mouse
kidney cells 679
spleen cells 155
technique with
cerium capture agent 155
lanthanide capture method 679
β-xylosides induced modulations 549
glycosaminoglycans 549
in liver myofibroblast-like cells 549

## Y

yolk proteins and their precursors 639
monoclonal and polyclonal antibodies 639
gradient gel electrophoresis 639

## Z

zona pellucida 623
binding affinity of lectin 623
during hamster oocyte maturation 623
